

# Rolls Packaging

Packaging systems designed for  
industrial rolls storage and transport

[www.wgp4.com/en](http://www.wgp4.com/en)

# Pallet

*Epal Pallets*

Epal pallets made in compliance with the European Standard UNI-EN 13698-1, which establishes and regulates construction criteria and dimensions.

“Oversized” wooden pallets, customizable in size and exposed to HT / fumigation treatment (standard ISPM-15 FitOk) where required.

*«Oversized» Wooden Pallets*

*Plastic Pallets*

Plastic pallets that guarantee greater lightness, durability and possibility of reuse, as well as being completely resistant to external agents and harmful organisms.

# Chipboards and Metal Profiles

Chipboards specifically designed to facilitate packaging and storage of industrial rolls.

Available in various sizes and thicknesses, they can be customized according to customer request, for example, with specific holes which facilitate packaging activities.

*Chipboard*

The use of specifically designed metal profiles allows to realize a stable and safe packaging system.

The combination of these elements allows to stack the goods and to carry out multiple shipments via truck/container.

# Expanded Polyethylene (Foam)

Non-abrasive expanded polyethylene (*Foam*), soft and easy to process, anti-scratch material, dust-proof and dump-proof.

Available in standard heights rolls (500, 1000, 1250, 1500, 2000mm), it is also possible to realize customized rolls according to customer needs, with a minimum required production quantity.

Used to wrap the rolls before being housed in their respective cradles, it protects the material from bumps and scratches and ensures the perfect integrity in all stages of the transport.

# PP and PET Straps

---

Polypropylene - PP straps for automatic or manual use, in standard or customized dimensions and colours, completely recyclable and non-toxic.

*PP Strap*

Polyester - PET straps, suitable for all cases where the PP straps are excessively stressed.

The PET straps are characterized by very high toughness and they ensure maximum safety and stability during the transport.

*PET Straps*

*PP Strap*

*Strapping Machine*

# Stretch Film

Automatic and manual stretch films, from 10my to 30my and, only for automatic films, with a pre-stretch from 150% to 300%.

Made of a multi-layered co-extruded material (LLDPE) with virgin raw materials, in full compliance with the UNI-EN 13427 standard on recyclability and energy recovering.

Possible addition of anti-UV additives 6/12 months, according to requirements.

Available in various heights and colours (transparent, white opaque, black and blue) or on demand, with a minimum required production quantity.

Customizable with the application of the company logo, with a minimum required production quantity.
